# INTRODUCTION

The Department of Advanced Education works with other government departments in attempting to ensure that there are adequate numbers of appropriately trained manpower to provide the health and social services required by the citizens of Alberta. An inter-departmental committee composed of representatives of the Department of Advanced Education, the Department of Social Services and Community Health, and the Department of Hospitals and Medical Care has been charged with coordinating efforts in this area. It is anticipated that the newly formed Department of Manpower will be included on this committee in the future. This Health and Social Services Disciplines Committee has initiated the collection of a variety of information to provide an overview of the supply of and demand for health and social service manpower. This information will aid post-secondary educational institutions, service agencies and government departments in making decisions pertaining to the types and size of programming efforts in the health and social service fields.

The purpose of the inventory is to provide information on the training output from health and social service training programs in the Province. The data, primarily on the number of enrollees and graduates, can be used in conjunction with information provided by the service sector to identify the demand which may be placed on the advanced education system in the future and assess the capability of the system to meet that demand. Additional information on manpower supply and demand is available in the Health and Social Services Disciplines Committee Annual Report.

This inventory is not intended to provide an explanation of the various health and social service programs. Calandars providing detailed descriptions of the program requirements and related practicums can be obtained by contacting the appropriate vocational centre, college, technical institute or university.

The information in this inventory is for the 1977-78, 1978-79, 1979-80, 1980-81 and 1981-82 academic years and will continue to be updated on an annual basis.

Further information on the inventory can be obtained by contacting:

## FORMAT OF INVENTORY

The information in this inventory is categorized according to health and social service discipline and is standardized to include the following information:

1. a list of training programs and institutions offering the programs;

2. data on the number of applicants, enrolments and graduates in the 1977-78, 1978-79, 1979-80, 1980-81 and 1981-82 academic years; length of programs; intake and graduation dates; and information on quotas; and

3. a comments section which describes the data.

Because it was not always possible for an institution to provide all the data requested for the inventory, some of the tables are incomplete. When information was not available or not compiled for the inventory a dash (-) has been entered into the table. Blanks are used when information is not applicable to a program. The most common example of this is found in programs which do not have part time students. In these cases the PT columns on the tables will be blank.

The tables are structured, where possible, as follows:

| Academic Year | 1977-78 | 1978-79 | 1979-80 | 1980-81 | 1981-82 |
|---|---|---|---|---|---|
| Quota | 20 | | | | |
| | FT PT | FT PT | FT PT | FT PT | FT PT |
| Applicants | 27 | | | | |
| Enrolments | | | | | |
| 1st Year | 20 | | | | |
| 2nd Year | | 19 | | | |
| Graduates | | 18 | | | |

The tables differentiate between part-time and full-time students wherever possible. Occasionally, a figure will be listed which falls between the part-time and full-time columns of the table. This figure can be interpreted as representing both part-time and full-time students.

If readers wish to determine the attrition from a particular class, they can follow the enrolments from the first year of a particular program through to graduation. For example, in the table on the preceeding page, the second year enrolments shown in 1978-79 column of a two-year program represent the same class shown as first year enrolments in the 1977-78 column. The number of graduates from this two-year program would be shown as graduates in 1978-79. The attrition over the two-year program was two students.

## DATA COLLECTION AND DEFINITIONS

To collect the data presented in this inventory, the Health and Social Services Programs Branch of Advanced Education and Manpower sent data requests to be completed by the head of each program. Program heads were sent forms which were used to present data on their program with the column for the most recent academic year left blank. They were asked to fill in the information and return the forms.

The terms "applicants", "enrolments", "graduates" and "academic year" were defined as follows:

1. applicants to the program were to be measured by the completed applications from which enrolment was chosen in that academic year and;

2. annual enrolment was defined as the number of enrolments on the last possible date students were allowed to enrol in the first intake of the academic year plus any new enrolments from subsequent intakes during the academic year; and

3. graduates were defined as students who were awarded certificates, diplomas, or degrees.

4. academic year refers to September 1 of one year to August 31 of the following year (e.g. September 1, 1981 to August 31, 1982).

It is also important to note the following:

1. Quotas provided are occassionally exceeded as some attrition from a program may be anticipated or because students transfer from program to program. The quota refers to the optimal capacity of the program and is used as a general guideline for enrolment.

2. The deadline for accepting applications varies from program to program. Some program heads adhere to a strict deadline while others limit the number of applications they accept. Also, students often apply to more than one program in any given year. In some programs students apply directly to the affiliated hospital.

3. The definition of full-time and part-time may vary slightly from program to program due to the varying definitions used by the institutions.

4. Students are classified according to year depending upon the level of the majority of their courses. The number of students may increase from year to year due to students transferring into a program or repeating a year.

5. The comments provided at the end of each program summary qualify the data and should be reviewed when interpreting the data.

6. Provincial Summaries are provided on the yellow pages when more than one training program is reported.

Response to the data request was excellent and follow-up telephone calls were made when required. Updates on the data will be done on an annual basis.

**COMMENTS:**

1. The 1982-83 quota applies to the Justice Administration Department not just the Criminal Justice Diploma.

2. As of the 1981-82 reporting period, all figures have been adjusted to reflect definitions which are consistent with the College Student Records System and official institutional reporting. Information reported prior to 1981-82 may be at variance from figures reported as of 1981-82.

3. Enrolment figures for 1980-81 academic year are not available by year of program.

4. Of the 1981-82 graduates, one received a certificate. All nine graduates in 1978-79 received certificates. The number of graduates may exceed 2nd year students due to the manner of calculating 2nd year student status as well as the manner in which yearly graduate statistics are compiled.

COMMENTS:

1. An Environment Quality Control Certificate is also offered. However, there have never been very many applicants, enrolments or graduates. In 1977-78, 1 student enrolled in the Certificate Program and in 1981-82, 11 applications were received and 5 students enrolled.

2. Any students who leave the program between September and January are replaced by new students in January. This is an attempt to keep the enrolment at 30 throughout the year.

3. As of the 1981-82 reporting period, all figures have been adjusted to reflect definitions which are consistent with the College Student Records System and official institutional reporting. Information reported prior to 1981-82 may be at variance from figures reported as of 1981-82.

4. Applicants to the program refer to the number of students who apply to the program prior to registration and therefore does not include those students who enroll in the program after registration.

COMMENTS:

1. One of the first year enrolments in 1978-79 is a transfer student. One of the first year enrolments in 1980-81 is a repeating student who joined class in January. Therfore, first year enrolments exceed the quota in 1978-79 and 1980-81.

COMMENTS:

1. Previous to the 1980-81 academic year there were two intakes in the program, one in September and one in March. Therefore 1st year enrolments for 1980-81 also reflect students who enrolled in March 1980. These students proceeded into second year in March 1981.

2. The 1980-81 quota was set to accommodate curriculum revision which required extra faculty planning.

3. Part-time students enrolled in 1981-82 are registered in support courses only and not in nursing courses. These students will enroll in nursing courses in 1982-83.

COMMENTS:

1. As of 1981-82 academic year all figures have been adjusted to reflect definitions that are consistent with the College Records System and official institutional reporting. Information reported prior to 1981-82 may be at variance from figures reported as of 1981-82.

2. For Fall 1981, the numbers of students entering first year and second year nursing classes totalled 87 and 61 respectively. The mix of full-time/part-time and 1st year/2nd year reflected above differs somewhat from these numbers due to the definitions used for institutional reporting purposes which are based on contact hours and credits earned (including advanced credits).

**COMMENTS:**

1. The quota includes transfer students enrolling in the 2nd year as well as 1st year students. Continuing 2nd year students are not counted in the quota.

2. Enrolment figures for academic years prior to 1979-80 should be interpreted with caution due to problems in retrieving the data.

3. Transfer students who have credit for the 1st year courses can enter the program at the 2nd year level. Enrolment figures are low in 1980-81 because more transfer students were admitted into 2nd year in 1980-81.

| Graduates[2] | 56 | | 60 | | 62 | | 44 | 3 | 51 | |

**COMMENTS:**

1. The reason for the increase in number of students from third year to fourth year is that there are several students who, each year, return to University to upgrade their diploma to a degree. These students are classed as degree completion or post-diploma students. Within the department's records however, there is no differentiation made as the same degree is awarded in the end.

2. The reason that more students may graduate than are registered in 4th year is due to the fact that students will sometimes complete the required physiotherapy courses at the University of Alberta and then leave the University. These students then attend other universities in other cities to complete their optional courses while working. Upon successful completion of these approved electives the students would be awarded a degree from the University of Alberta.
